Fabulous Fourth Grade Designers

During the 2014-2015 school year, the Syosset Central School District formed a workgroup designed to gather and share information about the integration of technology into curriculum. This year, the technology workgroup is piloting several technology projects at various schools and times during the school year. Fabulous Fourth Graders at Berry Hill School are fortunate to participate in one of the pilots during their Electricity Unit. As part of that pilot, fourth graders designed a flashlight using Tinkercad Software and printed their design on a MakerBot 3D Printer. During the design phase, students learned about 3D shapes and how to move objects around on different work planes. Once the housing for the flashlight is printed, students will use a battery and lightbulb to wire a circuit that fits into the housing so they will have their own operational, keychain-sized flashlight. Fabulous Fourth Graders are excited to display their flashlights on Curriculum Night.

Have a wonderful weekend!
Sincerely,

Mrs. Joanne Mannion, Principal
