Caterpillars Arrive in Second Grade!

Our caterpillars arrived! Second graders were so excited to begin learning about how caterpillars turn into butterflies. They began by transferring the caterpillars into small containers filled with food. Over time, the second graders will observe the caterpillars grow in size and begin to molt. After molting, the larva will create a chrysalis where the transformation of caterpillar into butterfly begins. Second graders are so excited to learn and observe the process of metamorphosis. They are anxiously awaiting the emergence of their Painted Lady Butterflies and are looking forward to learning about their method of communication, habitat, and eating habits. To support their learning, the second graders enjoyed a PTA Cultural Arts Program about butterflies on Thursday, May 12, 2016.

Have a wonderful weekend!
Sincerely,

Mrs. Joanne Mannion, Principal
