Friendship Matters with Dr. Wood

December 2013

In November and December the fifth grade girls participated in “Friendship Matters,” a group led by a volunteer from the CAPS organization, Child Abuse and Prevention Services. This workshop is designed to help promote healthy friendships among girls. Students were able to talk openly about topics such as feeling left out, bullying, and how to form and maintain friendship with other girls. We are looking forward to the follow up workshop this Spring, “Friendship Matters Too!”
