## 3<sup>rd</sup> Grade Rocks!

Parent Visitation Day in Mrs. Martinovic's Class  
November 2013

During *Parent Visitation Day* this year at Baylis, the third graders in Mrs. Martinovic's class, along with their parents were put to a challenge. The students have been immersed in their science unit of Rocks and Minerals. During the visit, students were given twelve cards, each card had the name of a rock and some descriptive information about the rock. Students then had to decide from their tray of twelve rocks which rock was which based on the information. Mrs. Martinovic has never had a group guess all twelve rocks correctly on the first try, and according to other third grade teachers in the building, no one else has either, in all the years here at Baylis. Until, this year!!!! Brandon Levy, Jared Marcus, and Muhammad Shah, along with Mr. Levy and Mrs. Marcus were our winners. They completed the challenge on the first try and were declared our victors. Congratulations on an amazing job!!!! Maybe we will have a geologist from this group in our future!
